

Postman

Testing purpose :

<https://mead-weather-application.herokuapp.com/weather>

```
const express = require('express');
const mongodb = require('mongodb');
const bodyParser = require('body-parser');

const MongoClient = mongodb.MongoClient;
const url = "mongodb://localhost:27017";
const databaseName = 'shopping-api';
```

```
const app = express();

app.use(express.json());
```

```
app.use(bodyParser.urlencoded({ extended: false }));
MongoClient.connect(url,{useNewUrlParser : true}, function(err, res){ if
(err){return console.log("database connection error!");}
const db = res.db(databaseName);

///// here

})
```

```
app.post('/test', function(req, res){

  console.log("our first api");
  console.log(req.body.pname);
  res.send("this is for your my client");
  db.collection('staffss').insertOne(req.body);
  console.log(req.body);
})
```
